Abstract (en)
[origin: WO2010063550A1] The invention relates to an evaporator (10) for a refrigerator, in particular a domestic refrigerator, having at least one plate (1) and at least one refrigerant channel (4). The plate (1) has a receptacle for positioning a tube (2), which receptacle is formed by at least one projection, which forms a longitudinal guide of the tube (2), on the at least one plate (1) along which said tube is held. The tube (2) is, for example, a protective tube for a temperature sensor. The invention is also directed at a refrigerator, in particular a domestic refrigerator, which is equipped with said evaporator.
