Abstract (en)

[origin: WO2010063553A1] The invention relates to a carcass for a refrigeration appliance comprising an interior (3) surrounded by walls (6) and an open front, wherein a recess (8; 17) is formed in a wall (6) extending from the front of the carcass (1) in a depth direction of the carcass (1) and is closed by a light-impermeable pane (7), at least one light-emitting diode assembly (12) being accommodated in the recess. The carcass is characterized in that the pane (7) is at least locally transparent and a beam of light (13, 14) of the assembly (12) lies completely in the interior (3).
