Abstract (en)  
[origin: EP2374377A1] A display structure for a thermally conditioned display stand, with one or more open display sides, comprising a vertical row of display shelves (4) set on top of one another, a first column (5) and a second column along said row of shelves, wherein the first and second columns each have outlets for delivery of a flow of air over each of said shelves, where the flow of air delivered by the outlets of the second column encounters the flow of air delivered by the outlets of the first column.
