Abstract (en)

[origin: EP1854477A2] The present invention relates to compositions and methods for treating ophthalmic disorders of humans or animals. The present compositions and methods are highly suitable for intraocular administration into the interior of an eye and provide therapeutic effects to the eye as they are effective in stabilizing, enhancing and/or improving a patient's vision. More specifically, the present invention relates to compositions and methods for treating ophthalmic diseases or disorders with exudative, hemorrhagic and/or inflammatory conditions. Even more specifically, the present invention relates to compositions and methods for treating retinal diseases or disorders, and more specifically ophthalmic diseases or disorders related to impaired retinal vessel permeability and/or integrity.
