Abstract (en)

[origin: WO2009068342A1] The invention relates to a hand-held power tool (10) comprising a housing (11) having a longitudinal axis (13) and at least one cable (41) extending in the housing (11), which becomes electrically more safe and robust in that a frame-like cable carrier (46) is disposed in the housing (11) transverse to the longitudinal axis (13), particularly tensioned in a latchable manner axially in the housing (12), which holds the cable (41) in a defined position, particularly radially inwards in the center of the housing (11).
