Abstract (en)

[origin: EP2374947A1] The module (1) has sanitary basins (4, 5) arranged at a height displaceable separator (2) and provided with an automatic cleaning device (10). The separator is designed as front or rear walls. A drive is set on a floor (20), and a wall element (15) is arranged at a module frame (3). The basins are arranged in the frame in a swivelable, rotary symmetrical or curve symmetrical manner via the separator. The separator is rotatably supported around a horizontal axis or supported on a cam track in a swivelable manner. The basins are designed as bowls, bidets, urinals or wash basins. An independent claim is also included for a method for automatic cleaning of sanitary basins for sanitary blocks.
