Abstract (en)
[origin: EP2374961A2] The plastering strip (10) has a profile body (20), a base surface (12) for applying the plastering strip at a building element, particularly a door or a window stock and a protecting plate (38) connected with the profile body. The protection plate is formed in a defined curved cross-sectional shape. A bearing surface of the building elements are arranged in an assembly condition of the plastering strip.
