Abstract (en)
[origin: EP2374962A1] The system has a floor profile fixed at a floor (9) via a pin-type fixing part i.e. screw. A covering profile (3) i.e. closing profile, has sub-areas (4) with two inner contact surfaces (16). The floor profile has a guiding element with two outer contact surfaces (11), which are designed as projection units (13). The outer contact surfaces are provided at a horizontal aligned area (12) of the floor profile. The inner contact surfaces surround the outer surfaces in lateral manner, during mounting of the covering profile. The inner surfaces are laterally guided via the floor profile.
