Abstract (en)

[origin: EP2374984A2] The winder (1) has a winding device (10) provided at a housing (3), and a control device arranged at and/or in the housing and comprising a control element (4) and/or a display element (5). The control element and/or the display element is integrated into a front side of the housing. A mounting plate (26) is attached at a wall and accommodates the housing in an opening (25) in a form-fit manner. The mounting plate is locked with the housing. The winding device is freely rotated in a winding direction by a freewheel assembly (12).
