Abstract (en)

[origin: EP2375149A2] The system has a light unit (30) detachably fastened with an elongated carrier element, and an attachment element (50) for surrounding an elongated light source of the light unit, where the attachment element is detachably attached to the light unit. The attachment element includes an optical unit for influencing output of light of the light source and a sealing unit (58) provided at a contact area that is turned towards the light unit. The sealing unit comprises two seals extending along longitudinal sides.
