Abstract (en)

[origin: EP2375169A1] The oven has a cooking cavity formed in a cabinet, and a water reservoir (18) comprising a water circulation pipe guiding device (23) hydraulically connecting a water filling slide (16) to the water reservoir. The guiding device guides the water circulation pipe to interior of a channel (24) provided in the water reservoir during movement of the water filling slide between a retracted position and an extended position and vice versa, with respect to an outer surface of the oven and the water reservoir.
