Abstract (en)

A method for making a refrigerating cell (1) comprising an enclosure (2) whose walls (20) delimit at least partially a zone (200) for storing food products, the method comprising the steps of: -making the walls (20) of the enclosure (2) by die forming; -making at least one through hole (21) passing through at least one of the walls (20) of the enclosure (2). The step of making the walls (20) of the enclosure (2) by die forming comprises making by die forming visual reference means (3) that identify a first zone (22) where the through hole (21) is made.
