Abstract (en)  
[origin: US2010166867A1] The invention relates to osteogenic compositions composed of a coprecipitate that contains at least one insoluble calcium salt and at least one complex between an osteogenic protein and a polysaccharide, said coprecipitate being in divided form. The invention also relates to kits for performing the invention. The invention also relates to the process for preparing the coprecipitate in divided form, containing at least one insoluble calcium salt and at least one complex between an osteogenic protein and a polysaccharide. The invention also relates to the formulations, pharmaceutical products and medical devices comprising said coprecipitate.
