Abstract (en)

[origin: WO2010065366A1] A razor cartridge is provided having a first lateral end portion, a second lateral end portion, a front portion and a rear portion, wherein the rear portion has a back end wall. At least one blade is mounted to the housing, wherein the blade has a length extending from the first lateral end portion to the second lateral end portion. A guard is positioned at the front of the housing, and extends from the first lateral end portion to the second lateral end portion. A cap is positioned at the rear portion of the housing and has a length extending from the first lateral end portion to the second lateral end portion. The cap has a plurality of ribs generally transverse to the blade which define a plurality of channels that extend from the rear portion of the housing to at least along a portion of the rear wall.
