Abstract (en)
[origin: WO2010081934A1] An exhaust pipe arrangement for a vessel, comprising a set of exhaust pipes or similar which are supported on the vessel's hull. Each exhaust pipe or similar (1-6) comprises a separate lower part (1 b-6b) that is rigidly supported on the vessel's hull (11) and connected to a source of exhaust gas, and an upper part (1a-6a) that is arranged in a sliding manner in relation to the lower part (1b-6b), most preferably partially over the lower part. The exhaust pipes or similar (1-6) are arranged into an exhaust pipe group, with the upper parts (1a-6a) of the exhaust pipes or similar supported on a separate exhaust pipe group body part (7) that is fitted with transmission means (8, 9, 10) to move the upper parts (1 a-6a) of the exhaust pipes or similar in relation to the lower parts (1b-6b).
