Abstract (en)
[origin: WO2010066893A1] The invention relates to a washing machine, comprising a wash tub (30) that is filled with wash water and that has a drain opening (38), a drain pump (40), a drain line (50) that connects the water in the wash tub (30) to the drain pump (40), a valve part (52) that is connected to the wash tub in a sealed fashion, and comprising a pipe part (54) that is connected to the drain pump for water transfer; also a drain valve (60) that can float in the wash water, said valve being disposed moveably inside the valve part in order to seal the drain opening (38) in a closed position (B) when wash water is located inside the wash tub and when the drain pump (40) is idle, or in order to open the drain opening to an opened position (A) when no wash water is located inside the wash tub or when the drain pump is operating. The valve part (52) is designed in one piece together with the wash tub (30) and the pipe part (54) is connected to an outlet connection (56) of the valve part (52).
