Abstract (en)
[origin: WO2010082198A2] A deep-water port is provided which comprises an upper pier deck, a natural deep-water mooring and an under-deck breakwater portion. The port is a mega-structure constructed of prefabricated modular perforated inter-connected marine structure units. The pier deck/breakwater combination is constructed in deep water, connected by bridge to the coast, independent of dry land or any structure thereon, as well as of any separate breakwater.
