Abstract (en)
[origin: WO2010066535A1] The invention relates to a refrigerating appliance, in particular to a domestic freezer (1), having a basic structure (2) and a door (6), which bound a thermally insulated interior (5) when the door (6) is closed. The inner side (8) of the door (6), this inner side being directed towards the interior (5) when the door (6) is closed, has a seal (10) which is intended to seal, at least for the most part, the interior (5) when the door (6) is closed. Behind the seal (10), there is at least one clearance (13) in the inner side (8) of the door (6), and this is intended to let through air beneath the seal (10).
