Abstract (en)
[origin: WO2010066698A1] A measurement system (10) for measuring spaces (32) and/or objects, comprising at least one hand-held, non-contact distance meter (12) and at least one evaluation unit (18), wherein the measurement system (10) comprises an omnidirectional camera (14) disposed on the distance meter (12), and wherein the evaluation unit (18) is adapted such that it determines the position and direction of the distance meter (12) at the time of a distance measurement based on the image information recorded by the camera (14), generates corresponding position and direction data and assigns said data to the distance measurement.
