Abstract (en)  
[origin: WO2010078455A1] A computer-implemented system and method are described for image searching and image indexing that may be incorporated in a mobile device that is part of an object identification system. A computer-implemented system and method relating to a MISIS client and MISIS server that may be associated with mobile pointing and identification system for the searching and indexing of objects in in situ images in geographic space taken from the perspective of a system user located near the surface of the Earth including horizontal, oblique, and airborne perspectives.
