Abstract (en)

The textile element has a hose-like casing (1) drawn over a head of a user and made from fabric with electrostatically rechargeable plastic fibers, polyamide, polyurethane, silk or nylon, where the element is arranged adjacent to a partial area of mucous membrane of the user. The casing includes a soft, elastic neckline (2) and eye sections (3a) that are covered in a dust-proof manner by using a transparent cover. The eye sections are formed in a circular-shape, where the fibers comprise a filtering effect.
