Abstract (en)
[origin: EP2377415A2] The adapter has two heat-resistant safety parts with non-round cross-section in which openings (2.4) of a retaining part (2) are guided. The safety parts are anchored at fastening clips (2.3) by looping of an appliance. The appliance is separately, flexibly, stably and detachably attached at the retaining part, so that the retaining part is inserted into a central latching and locking opening of a base part by a locking flange (2.5.1.1). The retaining part is gradually locked by rotation and is rotated and fixed around an axle of a locking and fixing element (2.5) at the base part.
