Abstract (en)

[origin: EP2377435A1] The arrangement (10) has a carrier element (11) designed as a rear wall for contacting and/or supporting works (12) for optical presentation of the works. The carrier element and/or the works comprise a ferromagnetic area (13) that is formed by permanent magnets (15). The magnets are attached to the works at a rear side. A side of a ferromagnetic foil is provided with contact adhesive. A frame comprises a ferromagnetic area, where the frame and the carrier element are mutually attracted. A photo mount comprises a foil that is made from ferromagnetic material.
