Abstract (en)  
[origin: EP2377455A1] The insert (1) has wire loops (3) arranged one after another in a feeding direction (10) of a dishwasher in a bent manner. The wire loops are extended in breadth direction of a rack (2) approximately over entire breadth of the loops. One of the wire loops run in a spike (4) and another spike, which are towered in a height direction (12) of the dishwasher. A gap (17) is formed between the spikes and an associated rail (13) and accommodates disk-shaped items to be rinsed. Arc arrangements (21-23) are provided for the wire loops and are arranged at distance from each other.
