Abstract (en)
[origin: EP2377806A1] Forklift truck (1) for the handling of loads fitted with a tractor unit (2) with a frame (7) and a device (3) for the manipulation of loads comprising a portal (12) that is substantially vertical and connected to said frame (7); a first slide (13) and a second slide (16*), both connected to the portal (12); and first and second activator devices (18,20) to perform the sliding along one vertical direction (Y) of the first slide (13) and the sliding along a horizontal direction (X) of the second slide (16*) respectively; and third actuator devices (21) to allow the rotation of the portal (12) from a work position where the portal (12) is substantially vertical and at right angle to the frame (7) to a bent position where the portal (12) is coplanar with the frame (7).
