Abstract (en)
[origin: EP2378020A2] The pillar-crossbar-facade has a support structure, which is made of multiple support profiles (1) that are assembled in a pillar-crossbar design. The facade elements (3) are fastened on the support profiles in a sealing manner by pressure profiles (4) through crossbar-pillar gaskets (5,6). The connecting structure arranged between the pressure profile and the support profile has drainage- and aeration outlets.
