Abstract (en)

The present invention relates to a cooking oven with at least one slidable foodstuff support (10) and at least one pair of lateral guiding devices (32, 34) for said foodstuff support (10). The foodstuff support (10) includes at least one support embossing (22) formed in a lateral border (20) of said foodstuff support (10). The guiding devices (32, 34) of one pair are arranged at two opposite side walls of an oven cavity. At least one guiding device (32, 34) includes a rear embossing (26) interacting with the support embossing (22), so that the support embossing (22) and the rear embossing (26) form a push-in-stop for the foodstuff support (10). The at least one guiding device (32, 34) includes a front embossing (28) interacting with the support embossing (22), so that the support embossing (22) and the front embossing (28) form a pull-out-stop for the foodstuff support (10). The rear embossing (26) and the front embossing (28) extend into directions opposite to the direction of the support embossing (22). Further, the present invention relates to a corresponding foodstuff support (10) for the cooking oven. Additionally, the present invention relates to a side grid (30) for a side wall in an oven cavity of the cooking oven.
