Abstract (en)
[origin: WO2010072486A2] The invention relates to a refrigerating device comprising a built-in part that is guided on telescopic pull-out mechanisms (5) and can be extracted from an interior chamber (3). Each telescopic pull-out mechanism (5) comprises at least one rail which is fixed (9) in the interior chamber (3), a rail (12) that is movable with the built-in part (4) in the direction of depth of the interior space (3), and a cover part (13) extending along the movable rail (12). The cover part (13) has a front wall (21, 22, 23) covering a front end of the rails (9, 12) in the pull-out direction.
