Abstract (en)  
[origin: WO2010069760A1] The invention relates to a dishwasher, in particular a domestic dishwasher, at least having a domestic-appliance door which has at least one front operating panel (1) and an internal door element (3), between which a seal formed at least from a sealing element (29) and a sealing bed (33) is arranged at least in certain sections. According to the invention, the sealing element (29) and the sealing bed (33) form a single-piece structural unit, in particular a two-component extrusion.
