Abstract (en)
[origin: WO2010075984A2] The present invention relates to interdental wedges, to interdental devices made of a plurality, in particular two interdental wedges, to the use of the interdental wedges and the interdental devices, and to a method for fixing insulating material and/or matrices in the tooth area, and to a method for reversibly separating contact points of adjacent teeth, also known as dissociating the contact points.
