Abstract (en)  
[origin: WO2011103944A1] The invention relates to a method for controlling a labeling device (206), wherein the labeling device is part of a block system, which also comprises a supplying device (205) for supplying the items to be labeled, the method comprising the following steps: supplying a predetermined number of items by means of the supplying device, wherein the labeling device and the supplying device are operated at a first operating speed, automatically transferring the predetermined number of items to the labeling device, decoupling a drive of the labeling device from a drive of the supplying device, and operating the labeling device at a second operating speed.
