Abstract (en)

[origin: WO2010072231A1] The invention relates to a biomass power plant (100) for dry-wet simultaneous fermentation, having dry fermenter modules (11, 12) comprising dry fermenters (19, 20). In order to refine the biomass power plant (100) such that the length of the pipes for delivering process water is reduced to a minimum, the invention proposes to integrate a process water reservoir (10) between two dry fermenter modules (11, 12).
