Abstract (en)

[origin: WO2010072556A1] The invention relates to a method for operating a domestic appliance (1) for caring for laundry items (17), in which method, before a change to a spin mode, the laundry items (17) are distributed in a laundry distribution mode in an interior of a drum (2) of the domestic appliance (1) by raising and/or lowering a rotational speed (n) of the drum (2), wherein a degree (S) of the laundry items (17) bearing against an inner wall of the drum (2) is determined as a function of a measured variable and/or control variable (n, W), and the rotational speed (n) is raised and/or lowered and/or maintained on the basis of the degree (S) of the laundry items (17) bearing against the inner wall.
