Abstract (en)  
[origin: WO2010076135A1] The present invention relates to a dryer (1) having a drum (2) wherein the laundry to be dried is disposed and which is rotated around the horizontal axis (X1), an intake opening (3) which is located at the front side of the drum (2) and which provides the laundry to be loaded, a casing (4) which surrounds the intake opening (3), which is produced from plastic material and which provides the drum (2) to be borne from the front side, and rollers (8) which are mounted to the casing (4) inner side facing the drum (2), which support the drum (2) by being seated in the front support rim (6), which have a bearing bore (7) located at the center of the roller (8) and providing it to be borne in a rotatable manner, and which rotate around a rotational axis (X2) parallel to the horizontal axis (X1) of the drum (2) by the effect of the rotational movement of the drum (2).
