Abstract (en)  
[origin: WO2010082163A1] Industrialized construction system, characterized in that the structural elements of a building, whether these are vertical, horizontal and/or inclined, are made from rigid PVC sections or the like, filled with a paste based on an epoxy resin having a formula that differs according to the application. Vertical, horizontal and/or inclined insulation members in a building are made from an element formed by an agglomerate of the "hardboard" kind or the like, having undergone a chemical treatment in order to adapt it to the desired application depending on the kind of insulation desired.
