Abstract (en)

[origin: WO2010069724A2] The invention relates to a refrigerator (10), in particular a household refrigerator, comprising at least one shelf (18, 24) in at least one interior space (13) with at least one rear shelf section (18) and at least one front shelf section (24) which are coupled to each other. The rear shelf section (18) has a protruding stop (26) along its longitudinal edge (201) which faces the front shelf section (24), said protruding stop engaging beneath the front shelf section (24) when the second shelf section (24) is arranged in its storage end position (AP) in the plane of the first shelf section (18).
