Abstract (en)

[origin: WO2010069991A1] The invention relates to a system for collecting operating data of a vehicle, comprising a digital tachograph (1) that can be installed rigidly in the vehicle, and a receiver module (2) for receiving data for controlling the tachograph (1), said module being removably connected to said tachograph (1) by way of an interface prescribed by the tachograph (1), and at least one remote control (3) equipped with a transmitter for operating the tachograph (1), said remote control being adapted to wirelessly transfer data using the receiver module (2).
