Abstract (en)
[origin: WO2010070396A1] An electrical connector assembly comprising : - a first electrical connector, - a second electrical connector comprising: a dielectric housing, a TPA member, an electrical contact inserted from an outer position through an intermediate position to a locked position. The TPA member in an intermediate position, prevents the first and second electrical connectors to fully mate and, in the locked position, the contact is prevented from being moved to its locked position.
