Abstract (en)

[origin: WO2010076169A1] The invention relates to a power supply network for a vehicle having a drive source that can be driven by means of a starter drive source, in particular an electrical motor, having a starter power supply network (101) for supplying electrical power to the starter drive source, a vehicle power supply network (105) for supplying electrical power to at least one vehicle consumer, wherein an electrical store (119) is provided in the vehicle power supply network (105) for storing excess electrical power from the starter power supply network (101).
