Abstract (en)
[origin: WO2010069774A1] The invention relates to a method for operating a food preparation device (1) on an operating device (6), comprising at least the following steps: conducting an automatic identification process for identifying at least one operating feature of the food preparation device (1) by means of the operating device; and providing at least one operating mode adapted to the food preparation device (1) by means of the operating device (6) on the basis of the automatic identification process. In order to set operating parameters of the at least one operating mode, a user guidance adapted to the operating features can be provided at the operating device (6). The operating device (6) is designed to operate a food preparation device (1) and comprises at least one energy transmission area (13), the operating device (6) being designed to allow a method according to one of the preceding claims to proceed.
