Abstract (en)
[origin: EP2380817A1] The pallet (1) has a plate formed by sections (14, 14') extending along a main longitudinal direction of the pallet. Intermediate feet (34-1-34-3) are located between front feet (30-1-30-3) and rear feet (32-1-32-3). Middle material strips (40-1-40-3) form junction zones respectively located at the intermediate feet, where each zone is extended between the adjacent sections or one of the sections and one of longitudinal walls (10, 10'). The zone is extended in oblique manner with respect to a middle transverse axis of the zone. The zone is symmetric with respect to the middle transverse axis.
