Abstract (en)

[origin: EP2381049A2] The present invention relates to a screen device, comprising a screen roller, a screen which can be rolled up onto and rolled down from said screen roller, supporting elements (6) on the lateral sides of the screen roller for installing the screen roller in an interior space (4), a fixing body (7) to which at least one supporting element (6) can be attached by means of a sliding movement, comprising one or more guide elements (8a, 8b) for guiding said supporting element (6) during the sliding movement, in which the supporting element (6) can be attached to the guide elements (8a, 8b) for attaching the supporting element (6) to the fixing body (7), so that the screen roller can be installed in the interior space (4) from several directions.
