Abstract (en)
[origin: EP2381211A2] The device has an insert (8) fixed in an inner side of a casing (1) of a penetrator, where the device is arranged at a rear plate (10) of the penetrator by an elastic compensator (9) and acts together with a reinforcement charge (6). A shell (4) partially surrounds the device and lies at the inner side of the casing in a sliding manner by a part of an outer surface of the shell, where the shell lies directly at an explosive charge (3) by another part of the outer surface. The shell has an inner shell part and a sliding layer (7) partially surrounding the inner shell part.
