Abstract (en)  
[origin: WO2010086522A1] The present invention relates to a method for securing a document (1), as well as to a secure document (1) including a data medium (2) and an optical security component (3). The medium (2) includes a first surface (12) and a second surface (13). The optical component (3) includes a means (21) for generating optical effects and adhesive means (5) adhering to the first surface (21) of the medium (2). Customisation data (16,17,18,19,20) are written on the secure document (1). The secure document (1) also includes an additional sealing component (4) including adhesive means (10) adhering to the second surface (13) of the medium (2), the medium (2) including at least one perforation (14, 15) arranged so that the optical (3) and additional (4) components are bonded to each other through the perforation (14, 15).
