Abstract (en)

[origin: WO2010072558A1] Rest (2) which is intended for irons (12) comprising a groove-like recess between an upper peripheral region of an iron soleplate and a housing part arranged above the iron soleplate, or comprising a groove-like recess in an iron soleplate periphery or in a housing part, the iron rest having: a resting region (4) for the soleplate of the iron and also at least two mutually opposite, movable iron-soleplate-locking elements (8), for fixing and locking the iron on the rest (2) via the soleplate of the iron and/or a housing part, wherein the movable iron-soleplate-locking elements (8) are assigned to two different sides of the iron soleplate and can be adjusted in a variable manner relative to one another.
