Abstract (en)

[origin: WO2010084023A1] The present invention relates to devices (20) for large-scale media conditioning, to systems made of a plurality of such devices (20) and to a method for the operation thereof. The elements of the devices (20) according to the invention are optimally combined into a block that is substantially industrially premanufactured and can be easily adapted to different application cases and installation locations.
