Abstract (en)
[origin: EP2383052A1] The tool has a shank (2) comprising an end equipped with a handle (3) to seize and control the tool with a hand and another end equipped with a dent removal end fitting. The handle comprises a flange ring (6) forming a body side axial stop for thumb in support from a flared side (7). The flange ring forms a shank side axial support for the thumb from a blurred side (8) opposite to the flared side with respect to a longitudinal axis. The blurred side allows passage of the thumb in support on the shank.
