Abstract (en)

[origin: EP2383189A1] The transport- and presentation carrier (10) has a base area (12) for carrying containers and a circumferential wall, which extends on a side of the base area in an extending direction. The circumferential wall defines the container receiving volume area with a container receiving chamber. Another circumferential wall (28) extends on another side (16) of the base area. An independent claim is also included for a transport- and presentation unit with a container bundle.
