Abstract (en)
The invention relates in general to a kit for washing brassieres, bikini tops and the like. The brassiere washing brassiere washing kit comprising a shell comprising two hemispheres with a multiplicity of apertures, said hemispheres each accommodate a cup of the brassiere to form a cavity when the shell is closed; and an agitator placed in between said cups of the brassiere before the hemispheres of the shell are closed. The agitator is in the form of a rubber ball possessing a multiplicity of nodules. The apertures of the shell are sized to prevent: any part of the brassiere from extending through the shell.
