Abstract (en)

[origin: EP2383716A1] The device (2) has samples (8) which are arranged on the support structure (4) made up of timber, plastic, paperboard or composite material. An electronic indicator (6) e.g. picture screen, and electronic paper is also arranged on the support structure. A processor (10) and an electronic memory (12) are connected to the electronic indicator. The memory stores pictures of the commodities. The processor controls the electronic indicator to display the stored pictures of the commodities based on the inputs received through touch screen.
